GitHub: github.com/TalupulaYaswanth
Portfolio: talupulayaswanth.github.io/portfolio

E-Mail: Talupulayaswanth13@gmail.com
Mobile: +91 8179090074

SKILLS

Programming Languages:	C, C++, Java, Python, SQL
Databases & Storage:	MySQL, Relational Database Management Systems (RDBMS)
AI, ML & Deep Learning:	Natural Language Processing, Computer Vision, PyTorch, Scikit-learn, LinUCB
Web Development:	HTML5, CSS3, JavaScript, FastAPI, Flask, Streamlit
Developer Tools:	Git, GitHub, Git Bash, VS Code, Docker, Linux/Bash, Jupyter Notebook
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), OS
Soft Skills:	Analytical Problem Solving, Adaptability, Critical Thinking, Team Collaboration

PROJECTS

Automated Deadlock Detection & Visualization Engine <i>[GitHub]</i>	2026
- Interactive Resource Allocation Graph (RAG) visualization tracking process claims and allocation in real-time. - Banker's Algorithm core logic guaranteeing deadlock-free allocation matrices across simulated processes. - Interactive Streamlit control dashboard displaying live thread execution states and resource matrices. Tech Stack: Python, Streamlit, Operating Systems, Algorithm Design, Data Structures.	
Contextual Multi-Armed Bandit Recommendation Platform <i>[GitHub]</i>	2026
- Implemented LinUCB contextual bandit policy with online ridge regression updating recommendation weights per user click. - Ingested and transformed 10,000+ film metadata records with 35% faster processing speed. - Sub-100ms inference pipeline served through FastAPI microservices and Streamlit interface, yielding 28% relevance uplift. Tech Stack: Python, FastAPI, Scikit-learn, Pandas, NumPy, Streamlit, LinUCB.	
CodeExplain AI <i>[GitHub]</i>	2026
- Multi-language code parsing engine evaluating Abstract Syntax Trees across Python, C++, Java, and JavaScript. - Automated Big-O algorithmic time and space complexity breakdown generated via fine-tuned LLM prompts. - Real-time responsive dashboard rendering syntax highlighting, tokenized summaries, and optimization tips. Tech Stack: Python, Flask, NLP, LLM APIs, JavaScript, HTML5, CSS3.	

TRAINING

AI Engineer Launchpad Program – Lovely Professional University	Aug' 2026
- Completed an intensive 50-hour technical training curriculum focused on Large Language Models (LLMs), Agentic AI workflows, and modern software deployment architectures. - Built enterprise-ready application integrations utilizing prompt engineering, retrieval-augmented generation (RAG), and structured API schemas. Key Competencies: Large Language Models, Agentic AI, Prompt Engineering, API Integration, System Architecture.	

CERTIFICATIONS

Generative AI for Beginners – Infosys Springboard	Aug' 2026
AI for Everyone: Understanding and Applying the Basics – Infosys Springboard	Aug' 2026
Yuva AI for All – nasscom futureSkills Prime / INDIAai	Feb' 2026

ACHIEVEMENTS

- LeetCode 50 Days Badge (2026):** Maintained continuous problem-solving consistency across advanced Data Structures and Algorithms.
- Solved 200+ algorithmic problems** across LeetCode, GeeksforGeeks, and CodeChef focusing on Dynamic Programming, Trees, and Graphs.

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.65	Aug' 2024 – Present
Narayana Junior College	Poranki, Andhra Pradesh
Intermediate (12th Grade) — Percentage: 85%	Mar' 2024
