LinkedIn: [linkedin.com/in/talupula-yaswanth](https://www.linkedin.com/in/talupula-yaswanth)

GitHub: github.com/TalupulaYaswanth

Portfolio: talupulayaswanth.github.io/portfolio

SKILLS

Programming Languages:	C, C++, Java, Python, SQL
Databases & Storage:	MySQL, Relational Database Management Systems (RDBMS)
AI, ML & Deep Learning:	Natural Language Processing, Computer Vision, PyTorch, Scikit-learn
Web Development:	HTML5, CSS3, JavaScript, FastAPI
Developer Tools:	Git, GitHub, Git Bash, VS Code, Docker, Linux/Bash, Jupyter Notebook
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), OS
Soft Skills:	Analytical Problem Solving, Adaptability, Critical Thinking, Team Collaboration

PROJECTS

CodeExplain (AI Code Explanation Tool) *[GitHub]*

Jul' 2026

- Engineered a multi-language code analysis assistant with 92% parsing accuracy.
- Integrated LLM and NLP pipelines to break down code structures, achieving a 40% reduction in manual code review effort.
- Deployed a responsive developer dashboard handling real-time query rendering across 5+ distinct programming languages.

Tech Stack: Python, Flask, NLP, LLM APIs, JavaScript, HTML5, CSS3.

Movie Recommendation System *[GitHub]*

Apr' 2026

- Implemented a hybrid recommendation pipeline combining content-based filtering and collaborative strategies, improving prediction relevance by 28%.
- Processed over 10,000+ film metadata entries, optimizing data ingestion speed by 35%.
- Designed an interactive web interface reducing user search latency to under 200ms with seamless query retrieval.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Streamlit.

Automated Deadlock Detection Visualization Tool *[GitHub]*

Apr' 2026

- Designed a Streamlit-based web platform to simulate OS resource management and process concurrency.
- Built core detection logic integrating Banker's Algorithm with dynamic Resource Allocation Graph (RAG) visualizations for safe state tracking.
- Implemented a real-time dashboard tracking process execution states and resource allocation.

Tech Stack: Python, Streamlit, Operating Systems, Algorithm Design, Data Structures.

TRAINING

AI Engineer Launchpad Program – Lovely Professional University

Aug' 2026

- Completed an intensive 50-hour technical training curriculum focused on Large Language Models (LLMs), Agentic AI workflows, and modern software deployment architectures.
- Built enterprise-ready application integrations utilizing prompt engineering, retrieval-augmented generation (RAG), and structured API schemas.

Key Competencies: Large Language Models, Agentic AI, Prompt Engineering, API Integration, System Architecture.

CERTIFICATIONS

- | | |
|---|-----------|
| • Generative AI for Beginners – Infosys Springboard | Aug' 2026 |
| • AI for Everyone: Understanding and Applying the Basics – Infosys Springboard | Aug' 2026 |
| • Yuva AI for All – nasscom futureSkills Prime / INDIAai | Feb' 2026 |

ACHIEVEMENTS

- LeetCode 50 Days Badge (2026):** Maintained continuous problem-solving consistency across advanced Data Structures and Algorithms.
- 200+ Algorithmic Problems Solved:** Solved 200+ algorithmic problems across LeetCode, GeeksforGeeks, and CodeChef focusing on Dynamic Programming, Trees, and Graphs.

EDUCATION

- | | |
|--|---------------------------------|
| Lovely Professional University | Phagwara, Punjab |
| Bachelor of Technology in Computer Science and Engineering — CGPA: 7.65 | Aug' 2024 – Present |
| Narayana Junior College | Poranki, Andhra Pradesh |
| Intermediate (12th Grade) – Mathematics, Physics, Chemistry — Percentage: 85% | Mar' 2024 |
| Vijayanikethan E.M. High School | Panyam, Kurnool, Andhra Pradesh |
| Secondary School Certificate (10th Grade) — Percentage: 63% | Apr' 2022 |
